

Title: Service Design Course

Professor: Dr. Matthias Heintz

Course Description:

Service design is a multidisciplinary approach that focuses on creating and improving services to enhance customer experiences, operational efficiency, and overall service quality. It involves designing every aspect of a service, including its processes, interactions, touchpoints, and user interfaces, with the goal of delivering valuable and seamless experiences to both customers and service providers.

Deadlines:

1. Creating service design template: 20TH October 2023
2. Creating Methodologies for service design: 20TH November 2023
